

I am an over-the-road truck driver. You can't get a radio station very long before it fades. I got XM satellite radio to be able to get a variety of stations and listen to them in peace. It is safer than fiddling with the radio every 30 minutes, looking for a station. Also, having weather and traffic channels make driving much safer!

Please do not limit XM - it's the cable TV of radio!

Thank you,
